I shared w/Karl too but have not heard from him all day.

I haven't had a chance to review and likely same for me!! Want me to share with CDC EOC to find a lab person thru that route?

Really? Well, I do like working with Heather but don't see this as her place.

Apparently, she has a chemistry background.pretty sure she told me that once.

Analytical method that PK sent is a mystery to me. I just don't have the analytical knowledge. Hopefully Cindy can comment....and/or others.

Thanks Jack :)

Heather really unhappy w/ATSDR use of word safe in email to WVDEP. Said we are impugning our scientific integrity if we allow comms people to translate our messages into plain language like that. I disagreed. A lot. Something any group multiagency confab can work thru, like our old Tiger Team.
